

## Day #1 Scan List

### Day #1 Morning Scan List – Urogenital

Renal/Bladder Skills: Scan the following items using both curvilinear and phased array probes

	Able to demonstrate [ ]
Diaphragm (coronal view)	
Liver	
Spleen	
Hepatorenal recess	
Right kidney longitudinal with fanning (through the kidney) and rocking (to show both poles)	
Right kidney transverse	
Splenorenal recess	
Left kidney longitudinal with fanning and rocking through the kidney	
Left kidney transverse	
Bladder longitudinal	
Bladder transverse	
Measure bladder volume	
Uterus	
Endovaginal stripe	
Prostate	
Acoustic Enhancement	
Edge Shadowing artifact	
Reverberation artifact	
Aorta (Coronal view)	
IVC (Coronal view)	

### Day #1 Afternoon Scan List – Pulmonary/Pleura

Lung/pleura: scan using both phased array and linear probes

	Able to demonstrate [ ]
Pleural line	
Lung sliding	
Lung pulse	
Rib shadows (Bat Sign)	
A Lines	
Curtain Sign	
Liver	
Spleen	
Vertebral spine (spine sign)	
Acoustic Shadowing Artifact (vertebral spine)
